

Hebrew Keyboard layout for MAC

Change your Keyboard input language to Hebrew. [⌘ + Space on your MAC keyboard]

See <http://www.etz-hayim.com/hebrew/resources/> for directions to set up your computer for Hebrew language input.

The MAC Keyboard locates vowel diacritics and other diacritics on different keys to the PC.

Common vowels are on the top “number” row. Use **CAPS LOCK** to type the vowel after each letter.

Shin with a dot requires SHIFT “A” װ

Sin requires ALT “A” ױ

Gereshayim is SHIFT LOCK + ALT + C ם

Geresh is SHIFT LOCK + ALT + B ן

ALT and < is *Dagesh dot*

ALT and U is *Shuruk*. ׀

SHIFT and U is *Holem Vav* ײ

Other diacritical marks (e.g., *meteg*, *revia*) can be included in your document using the Character palette. [Select **Show Character Palette** under the Language icon on the top left of your screen.]
